Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, May 28, 2016 — 10:00 a.m.

You yourself cannot assess the impact of these messages. However, you can be sure their action in the Mission is far-reaching. They have become an important element in our teaching; this is all according to the wishes of the hierarchy of Masters who are very attentive to the spiritual welfare of our dear abhyasis. Our brothers and sisters are all being monitored and helped in accordance with the needs of the moment, in order to allow them an unprecedented growth. The current era opens up vast horizons on the matter; many opportunities exist for the expansion of Sahaj Marg. The incarnate Master is working towards it, and we will always guide him accordingly. He is the man for the job, shall we say, and he will achieve great things. This way has real potential suited to the current era. All this will be demonstrated in the future.

Everything moves slowly on Earth; we can only adapt to its pace and seize the opportunities available to us to promote its expansion. These writings will remain important in the history of our way — it is said that words may be forgotten, but the written aspect lives on. Human beings need concrete reference points that can give them something to refer to when necessary. Written tradition has followed oral tradition, thus allowing the Great Beings of the very distant past to convey a teaching that still holds true among their current followers. From here we can foresee the era of the future to which the essence of this acquired treasure will be transmitted; we are working towards that. This is how it is.
