Whispers from The Brighter World

Saturday, June 4, 2016 — 10:00 a.m.

Why not value these notebooks in which your heart sings with love — love can never be sung too much. With so many complaints, and even cries of despair, rising up to us, we cannot help but appreciate these rather special "songs". We fully receive messages of love; they enchant us, one might say. Beauty is distinct from the ugliness that is so distressing in this world. Humanity should move towards what is good, but it is such a slow process. We can only dream of blessed times when everything will evolve in the right direction, leaving aside the miasma that slows down this world considerably.

A spiritual way is a valuable asset; it exudes positive vibrations through its continuous action in various countries of the world. It creates luminous axes that are reference points for many men and women who thirst for a real transmission emanating from the heart of the Masters, and who are nourished by its benefits. The path of Sahaj Marg offers an important feature: the ceaseless diffusion of a specific energy. Sahaj Marg will surprise people in the future when the perception of such subtle phenomena will be more obvious; we are working towards this. The alliance of united Masters, as well as the beautiful and great souls that have come to join us, are working towards the advancement of this phenomenon that is so decisive for the future of humanity. Sending out thoughts of love must become a natural practice — one that is good for the person concerned and for the whole community.

This is how it is.
