Whispers from The Brighter World

Monday, August 22, 2016 — 10:00 a.m.

There have already been messages from dubious sources, and such will be the case again. In the future, it will be necessary to be particularly vigilant on this point. This situation has always existed, and other paths have had to take appropriate measures to protect their sacred writings; such are human beings. May these pages always be preserved and respected as they should be. Our dear son Kamlesh will see to this and take the necessary precautions to safeguard this spiritual treasure. There are currently many suitable means for doing so. The future will reveal the true value of these messages after significant changes that will, by necessity, bring more wisdom here below. All in good time. It is wise to live in the current moment and do one's best. Each incarnation offers the opportunity to grow and to access the next level a little more each time. Sahaj Marg guides our dear abhyasis to the fullest extent — such is our constant wish.

To all, the best.
