Whispers from The Brighter World

Monday, August 29, 2016 — 10:00 a.m.

In this very special space where our spirits meet and unite through this contact, the best happens. These writings radiate a special vibration that is not yet sensed in all its subtlety, but it will be over time, and this vibration will benefit the whole Mission, which is endowed with more than one asset. The coming times will witness an evolution that will be, shall we say, dramatic. Very ancient civilisations reached levels that are unimaginable today; this fact is not easy to accept, and yet it is true. The future also holds its share of surprises. Everything has long been planned in this evolutionary system — all in its own time. Sahaj Marg will establish itself more and more and leave a significant mark in this world.

May all have faith and courage on this journey of their existence in this world — we lavish our endless blessings on them.
