Whispers from The Brighter World

Thursday, September 1, 2016 — 10:00 a.m.

Forget this world and its depravity, and plunge inside yourself, into the heart of silence where this unique contact with us is established. This occurrence is quite longstanding; it has produced thousands of pages that record comments emanating from the assembly of united Masters. These comments are not trivial, you can be sure, and they will have left their mark on this time when the current world has moved on, out of absolute necessity. These repetitions have their own advantage; they create the necessary vibration to touch the sensitive points of a being — points that are connected with higher planes.

Does a human being know himself or herself? It does not seem so. The subtlety that characterises a person is still unknown to science, even a science that is very advanced in other areas. All in good time. Humanity must extricate itself from gross vibrations in order to reach a higher level of knowledge — this is in progress. We cannot rush anything, but only prepare people's minds in our own manner. The process will be very profitable. This is how it is.

Blessed are all our brothers and sisters.
