Whispers from The Brighter World

Saturday, November 19, 2016 — 10:00 a.m.

The vibration of these messages has a greater impact than it appears. They are given for various reasons, and time will bring to light the benefits generated by this vibration. In his own way, our dear Kamlesh is a visionary, and the future will benefit fully from his action, both materially and spiritually. Each one of us left our mark on this Mission differently, in accordance with the needs at that moment; the future will show, even more, all the subtlety of each Master's action, one that is not negligible.

This world of madness worries us — how can it be led to more wisdom and be enlightened on the necessity of personal and spiritual growth for the global evolution of humanity? These notions are not considered as they should be. This world must also find its own way, one might say — a way that would relieve it from all current grossness, whose density is disturbing. Many beautiful souls are evolving magnificently, giving hope for a more radiant and positive future for this entire creation that is also suffering. All our action goes in this direction, and the united Masters of various faiths contribute to it. The task is daunting, but nothing is impossible to the higher power.
