Whispers from The Brighter World

Monday, December 5, 2016 — 10:00 a.m.

Rejoin us in this very special space where you aspire to find us. This ritual has existed for so long that it seems the most natural thing. Our energies support you and cover the entire Mission in every corner of the world. No one is forgotten, you can be sure; we follow all our abhyasis wherever they are in the world. All are united in the same aura. It brightly shines in the kingdom of heaven and has expanded over time, asserting itself more and more in view of an unprecedented action. Some facts cannot be demonstrated objectively, but to a very large extent reality is a given, both for us and for all of you. These phenomena cannot be explained — they are beyond human comprehension, and this guarded domain keeps its mystery well. It is nevertheless active and even very productive. That which cannot be achieved humanly is brought about by other means, according to well-established laws that are very active in every respect. Knowledge in this field is still very limited; the time has not arrived when these laws can be unveiled, but it will come and this is certain. We are preparing our abhyasis in our own manner, very far from the current human criteria that stand at a much lower level than reality. Everything in its time.

Humanity cannot change as easily as we would like. What matters are the perspectives that are dawning in front of us and that let us envision the best, particularly for this beautiful path of Sahaj Marg that is so dear to us.

We wish you all the best.
