Whispers from The Brighter World

Monday, December 12, 2016 — 10:00 a.m.

You relay with great faithfulness what your heart receives from our united hearts. You are carried by such love that this ritual is rewarded by our fidelity. In its essence, Sahaj Marg is a divine gift; the Masters of this Mission succeeded one another and contributed a personal touch to it, leading it to its current level. Its expansion in the world will continue, according to the divine will that sees and foresees what is good for human beings and, in particular, the blossoming of their souls. This long journey through time leads to reflection and to a commitment to one's profound aspiration to unite with the Divine. In this lies the goal of each incarnation, in order that one may achieve excellence. It can take time to lead a human being to this level. Nothing is done in vain; every experience is useful and sometimes proves to be more important than it seems.

Divine laws guard well their mystery; they act for the general good and the orchestration that is necessary for a far-reaching action concerning human evolution. This evolution goes through stages that are difficult and trying for a human being, who must surrender to its action. Great and beautiful souls who work among us have gone through very heavy trials and are now benefiting from an acquired wisdom that is decisive in their upliftment to higher planes. A fervent heart attracts our favours and constant attention.

Very special blessings to all.
