Wednesday, June 16, 2004 – 10:00 a.m.

This planet is being harmed by humans in an alarming way. Nothing stops them in their inventions. Allegedly intended for their well-being, these inventions are leading them to their ruin.

Physically, they suffer from unexplained ills; electromagnetic pollution, among others, destabilises them. The picture is dark on this point. Under the pretence of comfort, humans are subjected to polluting and destructive systems of which they have no idea, and those who understand this fail to make themselves heard. Given this situation, it is not easy for them to keep a satisfactory balance with regard to their nerves, and many harmful effects end up disturbing them.

More than ever, it is a divine gift to keep a space within oneself where one is able to face one's true nature. Far from the multiple aggressions of this world, there is an oasis of purity and beauty – when one searches for it.

From time immemorial, human beings have felt the pull towards such a path, as the call of the soul is inescapable. Our aspirants have understood this, and their lives, being centred on this objective, follow the desired trajectory. This thirst of the soul to unite with Divinity is inextinguishable, and our way applies itself to that by supporting their search. May they all reach the goal without weakening; our blessings accompany them.
