Whispers from The Brighter World

Friday, February 24, 2017 — 10:00 a.m.

This communication between our hearts has generated so much love that it will leave a mark in your heart forever. It has substantially changed a spiritual journey that will, in the future, stand out more and more across the world, given its power of action. It is decisive for more than one reason and makes its way in people's hearts in an unprecedented manner. This Mission still has so much to offer, far beyond what is imaginable today. In some parts of India, high meeting places will be created, places capable of multiplying its prevailing action. The future still holds beautiful surprises; the best is yet to come.

This is how it is.
