Whispers from The Brighter World

Thursday, March 2, 2017

Now this rendezvous of the heart is being held — it is so important for so many of our abhyasis. Rituals mark our Sahaj Marg Mission with very special transmissions of energy. These are the hallmark of a meditation that seems simple but whose effects are much more productive than it would appear. So many fervent beings join together through thought, through the heart — the central axis of this action [of transmission] — to attract the action of the Masters which supports the work of the living Master. The heart is the centre point of this vast universe in which spirituality reigns; here, the best is accomplished under the effect of a concerted action.

May the best be achieved and greatly strengthen this unparalleled egregore. Special blessings to all.

Babuji Maharaj
