Whispers from The Brighter World

Monday, March 27, 2017 — 10:00 a.m.

Life in the future will be very different from what it is today; major changes will occur, leading life on Earth to principles quite different from those of current times. An unprecedented evolution will reveal here below certain possibilities of life that will be, shall we say, extremely surprising. Sahaj Marg will establish itself over time and will manage to open people's minds in the best sense. Spirituality could transform this world now as it never has; everything has been planned for a long while and will happen in due time for the good of this world that is currently so confused. We are all working for the good. The building of a better world is progressing in its own manner, and its achievement would surprise people.

Special blessings to all.

Babuji Maharaj
