Whispers from The Brighter World

Thursday, April 13, 2017 - 10:00 a.m.

Each person's fate is written, and none can get around it. From one life to the next, it becomes clearer and leads the being towards his or her destiny — that which guides one's present and future life, whether one is conscious of it or not. Each step is necessary; sometimes people manage to cope with it, but at other times they do not. Surrender to the inner Master gives one strength, allowing the best to happen in spite of inevitable drifts. The practice of Sahaj Marg provides a great deal — much more than it seems.

A life is shaped little by little, according to the necessity of the moment, yet within the framework of this unavoidable destiny. Following a spiritual way clears the path; from lifetime to lifetime the real reasons become clearer and guide the being towards reality. How to know, predict, and above all imagine the sequence of events in this epic aimed at attaining this higher level — a level at which each and every one aspires to develop and elevate themselves for the best that can be. Sahaj Marg is the simple way, yet one that is so just and productive. No one ever regrets it. When the best is achieved, reality is established, everything is consolidated and new spaces appear.

To all, faith and courage; the ultimate goal is on the horizon and it can surely be achieved.
