Whispers from The Brighter World
A Sixth Revelation

Sunday, February 8, 2009 – 10:30 a.m.

The courage of my son is fruitful. This long talk on the messages touched more than one heart, conscious or not of the resulting effect. An analysis of his remarks will allow many to see the messages in a different light.

Everything advances slowly in the world of human beings, especially at the current level of consciousness where one is obliged to act. As a whole, 'Master's message' is well accepted and understood. Time will do its work, increasing broadmindedness in times to come - it is in the nature of things. Stagnation is not a characteristic of our Mission, which is centred neither on power nor on material profit. Its purpose is to help humanity progress towards a level that is in keeping with an overall evolution; it is in the nature of things. This expansion of consciousness is inevitable. Our way is contributing to it, insofar as all feel involved and are already fully aware of it.

Enlightened beings will appreciate our 'audacity' regarding teaching; everything must contribute to this broadening of consciousness that we allude to. There lies our principle aim in the publication of these messages. Happy are those who understand and benefit from the special vibrations emanating from them.

May all advance on the path of evolution. Such is our vocation here below, for the good of a humanity trapped in the darkness of ignorance.

Blessings to all.
