Whispers from The Brighter World

Monday, August 27, 2012 — 10:00 a.m.

Once again, the ritual is being performed. Do our abhyasis imagine the number of messages given so far? It is unprecedented in the history of a spiritual way; this is to be emphasised and constitutes a true treasure for our Mission.

The benefits of a practice like ours are reinforced by the reading of books and messages as well as by other audio and video means currently available. Consciously or unconsciously, so many humans aspire to join in a way, that of the heart, capable of opening up infinite prospects to the motivated seeker. The benefit of a transmission like ours may not be palpable to all our aspirants, yet the transmission exists and reaches its target, regardless of whether it is felt or not which is rare. It is wonderful to see committed beings act, serving this Mission with ardour; we give back to them accordingly. The action of our way manifests itself fully; not only does the power of the incarnate Master remain unabated, but it reaches its point of excellence. All this is strengthened by the constant support of the alliance of united Masters who are very attentive to this action that is so essential on Earth. More than ever, it is a necessary action; so many people are seeking, many of them unconsciously. They feel within themselves a void, an emptiness which they fail to fill, without understanding the reasons why. The heart has its own reasons. The way is there inside them — it is waiting only for that: an opening to the Divine.

Blessed are those who find it and advance, convinced of the benefits they can have at all levels. May peace and love transform this world!
