Whispers from The Brighter World

Tuesday, September 25, 2012 — 10:00 a.m.

Protect yourself more from the ups and downs of life and regain serenity — that which enables this contact. It is important because these messages are now awaited by our abhyasis around the world. Isn't this a beautiful result! This fact shows that hearts are opening. Our way prepares them in more than one way; they are evolving differently, without even realising it. Only the result of this endeavour is significant, and we can judge the results obtained by the different means of approach offered to our aspirants.

The commitment of young people is gratifying; they are preparing a future where open-mindedness will be affirmed despite the many tumults that will occur throughout the world. Keeping an unwavering course of action in an approach of this kind allows one to stay focused on what is essential amidst the turmoil. The anchoring point lies there, within oneself, away from the agitation and controversies which Earthlings are fond of.

This planet, too, is on a rising path, but humans have yet to realise it and make the most of this opportunity offered by the movement of life in its most subtle essence. Perfection here on Earth will not manifest tomorrow. Harmony and peace should be given priority and should prevail, instead of these eternal fights caused by the differences of race, religion and ideas. May humanity reach a higher level of consciousness where people will be able to live in harmony in a better world that is more focused on an ideal of peace, and where individual choices — manifested in more than one way — will be respected regarding spirituality.

Our blessings to all.

Babuji
