Whispers from The Brighter World

Wednesday, January 30, 2013 – 10:00 a.m.

Everything is forgotten in these blessed moments when you immerse yourself in Us; this kind of ritual is necessary, too. Each of our abhyasis has their own ritual that opens the heavenly door to them. This is how spiritual work takes shape, supported by faith and fervour.

The aspirant needs these breaks, moments of immersion in a subtle vibration supported by a call from the heart. Here, too, repetition is necessary; it gives full scope to our action. To reach each being who follows and trusts us, by fostering an approach through the grace it engenders – this is in the order of things, and within the possibilities of a spiritual way like ours. Many aspects should be considered. All this escapes the vast majority of humans, who are far away from such subtleties.

Awakening, the one that opens the heavenly doors, is the ultimate goal to be attained for one and all on this Earth. The necessity of an incarnation lies here: to rise spiritually, to become refined and to grasp the reality of that incarnation – and of life in all its expression, here below and elsewhere. That should be the primary motivation in the existence of all human beings. Finding one's way, seizing the opportunity, transforming one's Earthly existence through an appropriate approach – these show an innate wisdom capable of accomplishing the best and facilitating the elevation of a blessed soul.

May all our brothers and sisters who are endowed with these privileges advance within our Mission according to their innermost aspirations, with the appropriate assistance that we provide them. 'What must be will be' – a sincere heart is always heard.
