Whispers from The Brighter World

Monday, February 18, 2013 – 10:00 a.m.

The heart is the essential organ for the life of the physical body, but not only that – it is the seat of the soul and determines the identity of the being as a whole. It is unique and holds the key to the whole personality. It is for many reasons the symbol of our Mission in its current and future expression, whereby the Mission will make its mark on people's minds on this Earth through a thorough approach to the Divine. This approach will be defined over time. It will correspond to an evolution that is global and decisive for humanity. Many events will contribute to it; we cannot anticipate anything, but only prepare people's minds.

This symbol is making its way into the hearts of our abhyasis who are open to the principles we offer them. Everything happens slowly here below and when the time is right. The various elements of this symbol are very simple. There is nothing special in this, only a few aspects essential to life on this Earth, which has as its centre point the divine energy existing at the heart of each of the cells of the human being. This remains the hidden side – as one might call it – hidden from the eyes of humans, from the multitude who do not care at all for such specificities.

In truth, everything is simple. These elements are purposely assembled here and are designated as such to define this new 'Symbol of our Mission'. That is its appropriate name, without any other consideration at the spiritual level.

May all our brothers and sisters one day benefit from the many advantages it offers. Such is the spiritual objective and the definitive hallmark of our way in its current and future development.

That is how it is!

May all be blessed and open to what we offer them to guide them on the path of truth and the expansion of the soul.
