Whispers from The Brighter World

Sunday, March 17, 2013 – 10:00 a.m.

Find within yourself that strength which propels you towards us, and thus the contact can be established. We have been able to dictate these words to you, such as they are, for more than twenty years. This principle is not new, and our chosen medium did not ask for anything; only profound reasons have permitted this choice and we are happy for that. Isn't the impressive number of these messages proof that we fully support what is being done? Critics can rest assured that all is in accordance with our wishes, without anything being added to the originals. Nothing about them must be changed in the future; human interpretation can result in unwanted digressions.

The exegesis of these writings is desirable. Going deeper into our comments, enabling their integration, and a very thorough study of them can only serve this teaching. Under no circumstances should it be distorted, as has been done in the past over the course of time with sacred writings of other spiritual paths. Interpretation by human beings can be based on their personal criteria, which are not to be considered here. The language used and the spelling must be perfectly respected, as must our words and the meaning given to them.

These writings will be a landmark in history; what does not seem obvious today will find its full meaning in the future, in a register like this one.

We had to make things clear here, at a time when the Sahaj Marg Mission is at a turning point in its history.

At the dawn of a new era, everything that concerns an issue as important as spiritual evolution must be set forth correctly and decisively.

May determination prevail in each of our abhyasis who are fervent and grateful to their Master for his sharing with them what constitutes the very essence of our way – the combination of past and present teaching in one single action induced by the higher powers.

Blessings to all for a thorough understanding of our words and for their personal enrichment, in accordance with our wishes.

Babuji
