Whispers from The Brighter World

Friday, March 7, 2014 – 10:00 a.m.

What do human disturbances matter; they are mere waves on the ocean of life. We cannot change this world at the material level, only prepare minds and hearts for this inevitable shift that will lead them in a direction that is suitable for their evolution. So many of our aspirants are transforming and crossing a threshold! Let them not doubt it: a real work is being carried out in our spiritual path, and this will ward off many evils. Effort bears fruit, an invaluable reward at this level.

The cycle of incarnations is long, when measured according to Earthly means of calculating time. Surrender remains the appropriate word here. Humans plan their lives, and their karma manifests itself in the essential aspects of their evolution. An incarnation is fraught with effects and consequences, at all levels. So many aspects are beyond the understanding of the common run of people. How to accept reality, that which determines a person's life in the smallest detail? Spiritual work as we propose it is productive, much more than our abhyasis might suppose. Here on the celestial fields, as they are sometimes called, the many souls who participated in this liberating movement on Earth do not regret it. May all truly motivate themselves and carry on in this direction. They will not regret it – of this they can be sure. One day, the divine goal will be attained, and Sahaj Marg will have contributed to it. This prospect is

becoming reality, and this result satisfies us in every respect. May all, more than ever, be motivated and thus save precious time, under our endless blessings.
