Whispers from The Brighter World

Wednesday, April 23, 2014 – 10:00 a.m.

My dear daughter, let us continue as long as possible on this journey of messages that many abhyasis appreciate. This very special bond between us allows the manifestation of this extraordinary love. The ability to note down these texts would not be sufficient; only this capacity of yours to love generates this situation. Many hearts that are sensitive, and becoming even more so, will perceive what exists beyond the words and the text as a whole. The new era will allow an expansion of consciousness, a sensitivity that will make it possible to capture a specific energy unfolding here. These writings will endure through time and remain a strong and representative expression of our Mission.

Many hearts are committed to this rather special yet very simple practice. One has only to stick to it, to open one's heart to grace, that which the incarnate Master bestows over the course of time. Venerating him creates subtle bonds; gratitude is a necessary element, but love – the love we advocate and keep alive by deploying these combined resources – is unique. May all our abhyasis become truly aware of this reality; Sahaj Marg offers many more possibilities than it might seem. It is up to each one to really want to access his or her best, to open doors wide and thus contribute to the expansion of this egregore that our abhyasis cannot define, but whose power of action is real. All

our brothers and sisters are united in this extraordinary flow of energy. To all, the best, under our constant blessings.

Babuji
