Whispers from The Brighter World

Friday, June 13, 2014 – 10:00 a.m.

We must live in the present, as intensely as possible, and not waste the opportunity offered by a true spiritual path. One life is short compared to eternity; it is but one more breath in this system that is so abstract for humans. They see their lives and the world in general in their own manner, based on information that is often unreliable. Following a way such as ours brings about results that open up more encouraging prospects on this level.

How many human beings care about their spiritual evolution? Many are doing their best, which is already good. Each person's behaviour matters greatly in this process; even in a way like ours, it is decisive for true success. All are supported and followed as appropriate. Individuals cannot choose their destiny, but their way of being can change depending on their personal growth. Life is always full of surprises, from beginning to end; everything is planned in advance and remains beyond human control. The opposite would not necessarily be good – so many false judgements and beliefs mislead human beings! We do not play the role of prophets; we are doing our best for the good of this Mission and of all abhyasis who trust us. They are on their way – one that will lead them as far as possible according to their commitment and their aspiration to the Divine. Life is not easy here below. Doing one's best with all one's heart, following one's Master, complying with his decisions – all this is a sign of wisdom and should be

remembered by all. One day the divine goal will be reached. It is good to advance with this perspective.

Blessings to all.

Babuji
