Whispers from The Brighter World

Tuesday, July 1, 2014 – 10:00 a.m.

Such a great many messages have been given here in this unusual manner; this is unprecedented in the history of spirituality. At the dawn of a new era, we had to propose a slightly different teaching capable of provoking questions and motivating our brothers and sisters in need of a sure advancement. It seems that pleasing images are no longer enough. The seeker expects something else, namely, a work capable of producing tangible results. There is progress, imperceptible but lasting in its effects; this achievement needs only to be further enriched in this quest for absolute splendour.

We do not intend to get people dreaming, but rather to encourage our abhyasis to move forward, to conquer within themselves a sacred space, with our blessings accompanying the very special work of their living Master. This fact is unprecedented: the time has come when we must act in such a manner for the good of a humanity that is suffering in so many ways. The human population has never risen to such a high number. Beings no longer have any real bearings – they are moving in the utmost illusion, created by an exacerbated materiality. Violence has reached a peak. How to change this wave that disrupts energies essential to life? Divine powers act in their own manner, and very effectively, to restore order here below. Such is the current picture of the world, where so many noble souls seek their path with a yearning that is deep and sincere.

May all be helped in the best possible sense. One day the divine goal will be attained, you can be sure. That is how it is.
