Whispers from The Brighter World

Friday, August 1, 2014 – 10:00 a.m.

After all the years of contact resulting in these messages, how many times have we come back to the same topics? Repetition is an integral part of life; without it what would this world be? Everything is constantly recurring here below, and beyond, to ensure the continuity of this divine movement in its creative principle.

The way of the heart opens up beautiful prospects; this feature is emphasised in our way for good reason, as the spiritual work is carried out here in particular. This work is not commonplace; it offers unique perspectives. Hindsight allows a favourable assessment of it. Is the 'spirit' of the Mission truly understood? Time will give it its letters of nobility. It already stands out in a very positive manner; it is felt on a time scale that distinguishes it from the banal. What must be will be: Sahaj Marg is clearing a majestic path to infinity, heralding future times in which substantial changes are in the making, planned for the good of humanity. This way will take on a different face, a different reality very positive with respect to human evolution. Many aspects of this world will need to be reconsidered. Everything, in its time, will take its place for the greater good of the created world in its entirety. Fostering the spiritual evolution of our brothers and sisters contributes to the grand plans for this world in what it will become by divine grace.

May all consider this essential aspect of life, beyond the multiple worries generated by an inescapable materiality, as it presents itself today and for a long time to come. Participating in this evolution is encouraging. One day, the divine goal will be attained; we are all working towards it in our own manner.

May all be motivated in their practice under our special blessings.

Babuji
