Whispers from The Brighter World

Monday, January 26, 2015 – 10:00 a.m.

Uncertainties are inevitable on the human plane. Human beings plan their lives, and what does God do: He laughs. Thus, the divine laws impose what must be, and people can only comply – doesn't everything have its raison d'être! Human beings have a very limited view of things; this world of illusion constantly deceives them. Here, we see it differently, hence our ability to solve what is problematic. Humanity, since the dawn of time, has been suffering; a day will come when it will be otherwise, after big changes whose reality cannot be perceived by human beings today.

Through its action on the spiritual plane, the Sahaj Marg path works for the good of all, even if the effects are not visible at the human level. What is gained on a path such as this one is considerable; this way participates in the overall upliftment. What is good for humans is beneficial for all. The negativity, the violence, and all the darkness released by what is evil are an unspeakable scourge. To contribute to the good of humanity by working for oneself – and by extension for the general good – is a generous act that shows great wisdom. In this Sahaj Marg Mission, we see brothers and sisters advancing without even being really aware of it; therein lies the most beautiful asset of this extraordinary way of the heart.

Blessings to all.

Babuji
