Whispers from The Brighter World

Wednesday, February 11, 2015 – 10:00 a.m.

These messages will have increasing importance in our Mission; they are an extraordinary teaching in the current state of knowledge. All sacred texts of the past come from the same sources, and so will it always be in this world of matter – a world linked to the higher powers who possess means still scarcely understood by humans. Words generate a vibration, one that touches the sensitive points of beings, allowing them to advance in the knowledge most appropriate for their personal evolution. Everything has its raison d'être; they must feed their physical bodies, but also their spirits, in proportion to their deepest aspirations. Sooner or later these aspirations reveal themselves and prevail in a life, leading one to a knowledge capable of nourishing and embellishing the soul.

This journey is endless, the laws of life and evolution regulate its details in a precise manner. Let us repeat it: everything has its raison d'être here below as elsewhere. The laws of life are very strict; they emanate from powers able to uphold a precise order, despite the numerous disturbances that disrupt the best laid plans. Absolute perfection does not exist, and this world would be boring if such were the case. As for the Sahaj Marg Mission, it does its best; it is expanding and winning over hearts in its own manner for the good of all – such is the goal. Time consolidates the effects of this exceptional transmission, as desired for the good of this suffering humanity. Only spirituality can help it to go beyond matter and transcend it.

Blessings to all.

Babuji
