Whispers from The Brighter World

Thursday, February 12, 2015 – 10:00 a.m.

Possessing this ability to love is a very precious gift – to love Divinity, the spiritual Master incarnate, able to represent on Earth this Entity so special that it can transform a life and take it to the highest level. These beings are chosen from among so many others, but indeed they are born for the purpose, though this is not apparent to the eyes of humans. They have a mission: to enlighten beings and lead them to a path they could not have imagined. Many of our brothers and sisters are in that situation; at a given moment, their lives changed course and they embarked on this path of Sahaj Marg. It is expanding in the world, and we are happy about it. What it can do in people's hearts is uncommon and unfolds over time, when received by divine grace.

Love at this level is a very special energy. What it can accomplish is beyond imagination; the human being is very small before it. It produces in hearts transformations that are capable, on their own, of enriching a life in ways one would never expect. Following a spiritual path like this saves precious time; these words are not in vain – they are very real; we can see this again and again, with pleasure. What is good for our brother and sister abhyasis can only make us happy. So it is.
