Whispers from The Brighter World

Tuesday, March 24, 2015 – 10:00 a.m.

When one is surrendered to the divine power, the best is accomplished and the soul is delighted. Its thirst for the Divine grows, and the work of a spiritual Master – as it is carried out here in this way of the heart – cannot but quench it. This action goes far beyond words and rituals, although they are necessary. Everything in this Mission is done to meet the expectations of our aspirants; their pace is respected, yet we go beyond their own action to open the way for them. The aim of all life is to get there, yet one has to understand this and have the necessary open-mindedness to make the move. Some beings would like to do it; they are ready for it, but they hesitate because of old commitments of their own to which they feel bound, and thus waste valuable time.

The current era brings about a new teaching, a different practice that is active on subtle levels. Sensitive points are targeted, producing results where they were not expected. Nothing is simple, ever, in this world. The world of the Spirit opens up new perspectives onto areas where the transformation in beings who aspire for the divine essence is accomplished, saving them precious time. We do repeat things, but this is necessary because of the way the world is designed – it takes a long time to make a

human being aware of Reality, far beyond the material realm. May all go through the necessary steps and reach the desired level. We are seeing to it.

Blessings to all.

Babuji
