Whispers from The Brighter World

Friday, April 17, 2015 – 10:00 a.m.

These writings are bearers of a subtle energy, we repeat. They will continue to inspire our very dear son Kamlesh, who has invested himself in his role as a Master brilliantly. We follow him step by step, like a precious treasure; he is our spokesperson, the chosen soul for this unparalleled function at the heart of this beautiful Mission. The Mission's constant development requires great attention. It will go far in time, and its action will be exemplary for the good it can bring when followed appropriately. We encourage our abhyasis to fully benefit from this subtle energy, which in the long run enchants the hearts that are offered to it. Here this precious organ possesses the wonder – this priceless jewel that carries life and holds secrets, those that humans cannot see but that do not escape our vigilance. When these treasures come into our view, haloed with love, we protect them with happiness and in our own manner.

A big seminar is being prepared in this country; it will be a rare moment. May the greatest number benefit from it. During this event, France, as it is called, will receive as is fitting and benefit from rare blessings – this is to be emphasised now. May all beings who are committed to this way, wherever they will be during the event, join the incarnate Master and all of us who are gathered, and benefit fully from our special blessings. This is how it is.
