Whispers from The Brighter World

Monday, April 27, 2015 – 10:00 a.m.

This sacred temple of Hyderabad will become the high place of our Mission, a point on this Earth blessed by the gods. It will make a lasting mark on the history of Sahaj Marg. Everything will take its place as planned; this site will be charged more and more with our energies. Memorable events will take place there, and we can only encourage our brothers and sisters to give it all due attention. There, our wishes materialise for this great spiritual Mission that will defy time, and we are happy for this. May all our brothers and sisters become aware of what is offered to them spiritually – this is how this sacred egregore that is so dear to us is strengthened.

Do all these beings, our brother and sister abhyasis, realise the importance of this way of the heart? This is not possible now; the future will grant it a place of choice. Evolution on this Earth will bring to light the benefits of its action which will take on its full magnitude in the future. All attention will be given to the vibratory movement that conditions all life on Earth. This aspect is not yet appreciated as it should be – everything in its time. All evolves very slowly on this planet, at the rhythm of its own pulse. All this seems abstract; life follows its own course, as do the lives of our abhyasis. Over time, we can measure the effects of this system on the brothers and sisters engaged in this process. It is amazing, and it makes us happy.

Blessings to all.

Babuji
