Whispers from The Brighter World

Wednesday, April 29, 2015 – 8:00 a.m.

Why would you not let your heart sing – these writings are beautiful, and they will be appreciated. Doesn't everything have its raison d'être! What is done spontaneously with sincerity is bound to touch some sensitive souls. This 'song of the heart' will not be forgotten.

Life is a long sequence of events. Our Mission follows its course, and its action in hearts is being amplified. This sumptuous edifice that is being constructed in Hyderabad will be the architectural masterpiece of the Sahaj Marg Mission, but also, and above all, a high place of spirituality that will remain through time – particularly in hearts by its unprecedented vibratory action. We can only rejoice for that and fully join this huge project whose foundations are already well established. The story of our beautiful Mission is inscribed in time. Happy are those who involve themselves in the service of the Masters for the Mission's growth and expansion in the world.

Sahaj Marg has not finished astonishing people; its apparent simplicity hides its power of action well. Words are one thing, but the results obtained by means of this method are another. Here, we can appreciate in their totality the benefits it generates. The future will increasingly bring to light this reality. May all our abhyasis focus on

what is essential and fully benefit from the opportunity offered them to make real progress, backed by our ceaseless action.

Blessings to all.

Babuji
