Whispers from The Brighter World

Saturday, May 2, 2015 – 10:00 a.m.

These celebration days leave a soothing feeling in people's hearts. Our action, perceived or not, contributes to this and marks these special moments. Very subtle vibrations emerge, generated in part by the state of reverence and commitment of each person, as well as by very special blessings that crown everything. May our abhyasis become truly aware of the importance of these anniversaries, which stand as specific milestones on their journey towards the divine realms.

Our expectations for this very special spiritual path are great, and they will not be in vain. The establishment of our way is now solid and its effects striking in their reality. So is it desired by the higher powers. The new era will fully benefit from this. Minds will open more and more to this higher reality; it cannot be defined in human terms, but it will be increasingly felt by hearts that are receptive to its greatness. Each of our abhyasis is pursuing his or her path, thus is each one's karma fulfilled. A spiritual commitment like this promotes this fulfilment in its sacred essence and opens new perspectives for it. The results obtained over time in this way of the heart are reassuring; no effort is futile. Doesn't everything have its raison d'être! May each of our brothers and sisters achieve the best, through a lasting commitment that is satisfactory in every respect. We are seeing to it; each receives according to their yearning.

Blessings to all.

Babuji
