Whispers from The Brighter World

Tuesday, May 12, 2015 – 10:00 a.m.

This visit of our dear Kamlesh has filled your heart and the hearts of many other abhyasis. His mission is beginning, and it will unfold over time in an impressive way that will meet our expectations. We support him with great love; his duty is already heavy, and it will continue to grow. He will be able to cope with it and organise himself accordingly. One can already feel the beginnings of a future that is different on many levels; sensitive beings who are open to these subtle vibrations can perceive them. The human being is passing through on this Earth. A person's role is minuscule and yet his or her wisdom fits perfectly into the divine plan with its multiple facets and consequences for all humanity.

A spiritual approach like the one we propose goes to the essential. Far from imposed rituals, our way is expanding in the world, simply but effectively. Each one takes ownership of this journey towards the ultimate goal in his or her own way. Practising correctly through personal and steadfast commitment opens subtle doors rich in effects on that spiritual heart, which hides its treasures so well. It keeps its mystery perfectly, outside the realm of scientific discoveries. The time for the plenitude of the sovereign Spirit has not yet come; it is being prepared in its own manner. This is how it is. From life to life, a treasure is being accumulated whose richness will one day surprise

people. May grace touch the hearts of all our brothers and sisters. They are not working in vain; may they be convinced of that.

Blessings to all.

Babuji
