Whispers from The Brighter World

Thursday, May 28, 2015 – 10:00 a.m.

Never mind the malicious comments of certain people. These messages reach many hearts sincere and open to this extraordinary transmission. They will remain a reference over time for this Mission. Seeing only the beautiful and the good is a strength in the face of adversity. Nothing is ever easy here below; such are the laws of this material world and all that characterise it. The lives of the Greatest Beings who worked on this Earth were not easy; these beings went through many trials, which further underscores the magnitude of their action. Our Mission is advancing – is that not the most important thing – its aura is growing and definitively positioning itself in this divine scheme.

The number of these writings constitutes a precious asset, and they are treated accordingly – the Masters are seeing to it and are ensuring their protection. This long journey of messages has had positive effects. We are well placed to assess this and are happy with the result. There is still much to be done. Time does its work. The action of the Master and the faith of our committed abhyasis form a precious whole. Many great things will still be done and will mark for a very long time this way of the heart, active in its effects on the hearts of all our brothers and sisters engaged in this journey that is like no other.

Special blessings to all.

Babuji
