Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, July 4, 2015 – 10:00 a.m.

Life is eternally beginning anew. Each day, the same acts are repeated in order to bring creation to its culmination. All existing kingdoms are caught in the same movement; in this the power from which this world emanates manifests in all its magnificence. Human beings are unable to grasp its subtlety, as it is beyond their understanding. With humility, they must adjust to all these principles and do their best for themselves and also for what surrounds them.

Following a spiritual path indicates a certain wisdom. Perfection is not easy to achieve – can it ever be? To strive towards it in the best possible manner is evidence of good sentiments. An appeal is always heard. Each person is carried in a certain way and guided according to his or her deepest aspirations, which differ from one to another. From life to life, a pattern is repeated that must be complied with in order to facilitate its positive manifestation. Nothing is ever simple. To some extent, everything must be redone to achieve the best.

These messages are given to be known by all our abhyasis. They are adapted to current times and to the life of each one of them. Their dissemination is now made easier, and it must remain active and accessible to those who aspire to read them, whether abhyasis or not. The Mission is expanding more widely in the world, and other means, more in line with modern life, are being implemented. We cannot but appreciate the new Master of the Mission with respect to his positive action; he is supported by the whole

Hierarchy of Masters. All our abhyasis are provided the opportunity to truly progress; it is up to them to choose and act accordingly.
