Whispers from The Brighter World

Friday, July 10, 2015 – 10:00 a.m.

The India of the future will be surprising in many ways; life will be very different from what it is today – time will confirm these words. Our way is preparing what must come, as spirituality will take on a wider scope for the good of all. We do not readily touch on such matters, and yet all these coming changes are unavoidable and will be decisive for human evolution. The new Master of this Mission, our beloved Kamlesh, will see a certain number of these changes; he will not only be able to face up to them, but will also readily adapt to situations and draw the best from them for the benefit of our Mission.

May all be reassured – everything is for the best; what must be will be, for the good of all our aspirants and, by extension, humankind. Following a spiritual path provides reference points; it creates a space conducive to the elevation of the soul and protects it from certain harmful vibrations. Our practice does not perform showy miracles, but it acts for the good of each and every one – much more than it seems. It is important to focus on the present; it prepares this future to which humans will have to adapt, as has always been the case in this world. This is how general evolution goes; the planet Earth is not the only one that must adjust itself. May all rest assured, we are not there yet; very few of them will see these big changes. Everything evolves very slowly

here below. The whole of creation is carried by the Divine; whether the human being acknowledges it or not, this is how it is.
