Whispers from The Brighter World

Sunday, October 18, 2015 – 10:00 a.m.

These messages accompany many of our abhyasis, sometimes more than they think, in their approach to their practice and long-term commitment. To create a mystical vibratory chain that can act on all of them is a very positive matter, an additional element to unite our brothers and sisters in this rather unusual approach. To have such a privilege in one's life is truly a blessing. We are following each of our aspirants according to their call – but also well beyond that, at levels of consciousness they themselves are not able to identify. Here, we will be able to assess the results obtained.

When our brothers and sisters come to join us, they truly discover what Sahaj Marg represents in this sphere so greatly ignored by the majority of men and women, who totally neglect this essential aspect of life. We are pleased with the results; everything is being done to achieve the best. What more can we hope for – an unprecedented progress, an even greater commitment from all members. Everything comes in its own time. Our blessings on this day literally cover the Mission; it is so dear to us, please be sure of it. It will continue to amaze you – and us as well.

Our best to all.

Babuji
