Whispers from The Brighter World

Monday, February 29, 2016 – 10:00 a.m.

Dive into yourself, in the heart of silence, where the wonder is fulfilled. This ritual, which has been so well established for a very long time, opens doors onto the Infinite. Thus are renewed these contacts where your soul, totally available, perceives our slightest calls. This relationship is very special; it allows us, through these writings, to better touch the sensitive and decisive points of our abhyasis who strongly aspire to merge with the Ultimate. Everything has its raison d'être. In such an area, it is necessary to clearly identify the innermost nature of each of our brothers and sisters – their real potential – in order to deepen this very special work so that it is continuously refined. Time allows us to better assess the results, which are not easily defined in human terms.

In the efforts of each one, nothing is lost. It is very satisfying to assess the tangible effects of these efforts and the vibratory power they release.

While it is not easy for one to assess the distance covered, let all rest assured that our assessment, on general and individual levels, fully satisfies us. Sahaj Marg was not born in vain. The sages of the past understood the need for a new method that is not only accessible to everyone, but is, above all, capable of leading sensitive beings to

the highest level of spiritual elevation. True commitment, fervour and determination to achieve the goal lead inevitably to the sought-after results.

This is how it is. Special blessings.

Babuji
