Whispers from The Brighter World

Tuesday, March 1, 2016 – 10:00 a.m.

From one lifetime to the next, a story is being written; every page of this very special book constitutes the achievement of the entity concerned. The principle of reincarnation is still quite far from being recognised for what it really is. In many respects, it is decisive for the evolution of all beings, who are included in this great divine scheme. The practice of Sahaj Marg allows a significant advancement; a true spiritual journey is a real boon for a fervent soul in search of realisation.

It cannot be achieved easily and requires genuine commitment on the part of the abhyasi, but you can be sure the result is worth it. A life is not given in vain; it is an element, both tiny and imposing, of this immense creation that is so amazing at all levels. The benefits obtained by practising Sahaj Marg are not yet recognised in their manifold effects. The substantial changes to come will further highlight these effects by promoting the evolutionary cycle of life in this world.

Everything is so slow at this level. The action of Sahaj Marg is geared towards this: refining the sensitivity of beings incarnated in an Earthly journey that fosters each one's evolution.

None of this is easy to understand, but these matters must be mentioned to prepare and further open the path to knowledge, which will become more accessible to all.

To each of our abhyasis we wish the best there is.

Babuji
