Whispers from The Brighter World

Friday, March 4, 2016 – 10:00 a.m.

To love intensely, infinitely, is the greatest wealth in the world. Such a connection to the Divine is a unique gift; achieving this level of consciousness is promising. From one incarnation to another, work is carried out that will one day allow one to reach the apotheosis. Seeing our faithful abhyasis committing and opening themselves to a knowledge that is irrefutable, is a unique benefit.

All these beautiful souls are uniting and progressing together under the guidance of the incarnate Master who is himself inspired by the high Hierarchy preparing the future of this Mission, whose expansion will be considerable. It will bring together the greatest number; emerging movements will join us to perfect this action and to advance even further the results achieved in this special process, one in which our aspirants are positioning themselves in a very satisfactory way.

The Sahaj Marg Mission will expand this work more and more, as it will be facing a growing call, in accordance with the divine plans. The future will bring about an expansion of consciousness to meet the needs of the new era. Our abhyasis are advancing more than they realise; these concepts are not easily assessed. What counts are only the results obtained and the power they will deploy for the general good.

Blessings to all.

Babuji
