Whispers from The Brighter World

Saturday, March 5, 2016 – 10:00 a.m.

All these years of contact have brought about this fact of a daily and unfailing ritual. A love out of the ordinary, one might say, animates these words.

Beyond the words, a specific energy touches receptive hearts and provides them with nourishment rich in its effects. All these messages are not given in vain; they build a special space in our Mission, and the greatest number of them will defy time. A fragrance of eternity will give them a chosen place. The new era will bring changes that have long been planned, generating transformations such as today's human beings cannot imagine. All these messages will be recognised and respected for their very special essence which emanates from the Divine. The current Mission will be transformed and gain serious support in various parts of the world, where spirituality will hold a real place in accordance with the growing needs of incarnate beings.

Abhyasis who have come to rejoin us constitute a force here that will increasingly work for the good of this way of the heart. Its effects are unparalleled, as it truly enables spiritual progress. Life on this Earth is called to change a great deal; for its part, life will keep the same demands, those of an ever greater subtlety leading it to the highest level of consciousness.

Special blessings to all.

Babuji
