Whispers from The Brighter World

Tuesday, March 8, 2016 – 10:00 a.m.

This long journey of messages has touched many hearts, more sensitive to the comments therein than they themselves believe. Years pass, and thousands of pages have accumulated, bringing this special gift to the path of Sahaj Marg. Over time we repeat ourselves, as does life in this world through its numerous workings, giving it the force of creation in all its works.

The power of creation is quite astounding – it results in such diversity. Human beings will continue to be surprised, and they are not at the end of their discoveries. Progress will allow them a different approach to phenomena, promoting real advancement in many domains. Civilisation of the future will reach a very high level of access to essential truths. Today's 'seeker' would be amazed by such discoveries. Everything in its time. Yes, the planet Earth is indeed round – this point of knowledge has been established for a very long time, but rest assured many others remain to be discovered. Divine laws don't reveal all their effects; tomorrow's human beings will attain such a level of consciousness that they will reach an unprecedented stage of knowledge. Spirituality will not be left out; it will be positioned differently, and it will

be better understood and followed in all its subtlety. The reign of the Spirit is dawning on the horizon. It will literally light up the world. This is how it is.

Special blessings.

Babuji
