Whispers from The Brighter World

Saturday, April 16, 2016 – 10:00 a.m.

Life is one and yet very diverse in its manifestation over the course of days. It remains true to itself while evolving according to the trajectory that is desired for the evolution of the subtle being. It takes time and numerous incarnations to achieve the goal, the end point that will bring this Earthly evolutionary cycle to closure, so to speak. What will the next incarnations be? Where and when will they happen? Everything is planned, and yet remains such a secret to humans. The important thing for them is to advance through the meanderings of the sovereign Spirit, the understanding of phenomena and their manifestations in many domains, even though their reality is not at all understood. Everything is only illusion here below; this has been proven. Certain facts amply demonstrate this, if only they could be brought to light. The current era will lead to discoveries that are unimaginable to many people today.

The future will allow for real progress, and our Sahaj Marg way will not be left behind in this perception of reality with regard to the world of matter – a world that is a perpetual illusion for the incarnate being. Certain stages must be gone through; the evolutionary process is very slow here below, but everything will have to change in the future. Our abhyasis are not ignorant. They know everything fluctuates, evolves and transforms over time. Significant changes will occur, and our brothers and sisters will

be prepared for them in our own manner. All is well. The Mission is growing in strength and its action in people's hearts is quite appreciable.

May they all be blessed.

Babuji
