Whispers from The Brighter World

Sunday, April 24, 2016 – 10:00 a.m.

All the heaviness of the world cannot trouble a loving heart in these moments of unique communion when it offers itself to ours with such surrender. These writings will endure through time. They deserve special attention, and our dear successors are seeing to it. The Mission is being built little by little; one day it will reach its apogee and will help an increasing number of brothers and sisters who long for the Divine. The reality of this concept will become clearer and clearer – that of a redeeming energy capable of helping the multitude calling for a true method, one that can lift them up to that same energy when they are receptive to its ceaseless action. Opening to the splendour of the Spirit is the most precious asset there is, one that in no way can be lost. It is a safe asset, of which we take particular care for the good of all our faithful abhyasis. This asset is for them immutable and will remain so; this is not insignificant. It is passed on from one lifetime to the next to meet the needs of each life. Simply, without big displays or rituals, real work takes place and serves the aspirant by helping him or her progress in a satisfactory way, thus fulfilling the subtle being in utmost discretion.

In the shadows and silence of the heart, the true personality of the human being blossoms. Though complex in its effects, the best nevertheless occurs and leads the aspirant to shores whose beauty cannot be imagined.

*May all become aware of the importance of their endeavour; they will not regret it. Special blessings.*
