Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Friday, May 20, 2016 – 10:00 a.m.

Life renews itself endlessly; these messages are the expression of an undying love and will mark this Mission definitively. They emanate from our united hearts to support our dearest Kamlesh in his very heavy task. They are specific, in more than one respect; the future will reveal the reasons for them, including the subtlety of their vibration, unique in its principle. Many aspects of life will become clearer, and human beings will manage to grasp what is not clear in these current times. They are being prepared and each one of our abhyasis, through their practice, their heartfelt commitment, contributes to the development of a better world. It is being built very slowly, without any possibility of avoiding the kind of violence that corresponds to the present era, in which the miasmas of past centuries are being eliminated in a certain way.

Life is never as simple as it appears; creation as a whole is of a complexity unimaginable in human terms.

Let us act at our level and our abhyasis, as they are able, work within their sphere of action, and all will be well. Each of the large seminars held by the incarnate Master is very important, representing the power of this path of the heart, one that is very simple in appearance, but which increasingly produces very satisfactory results; of this you can be sure. Thus are the divine plans fulfilled. They are inescapable in their action

on human beings, who are thirsting for the Divine. May all be filled at the source, carried by our love and ceaseless action upon this Sahaj Marg Mission.
