Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, May 22, 2016 – 10:00 a.m.

Isolate yourself in this cocoon of love where these messages take shape. Unlike those that imitate us, they spring from our united hearts. Our dear Kamlesh must remain vigilant on this point. This matter is nothing new, but the number of imitators is increasing and this is improper. Some people are sincere in this approach; they let themselves be deceived, one might say.

The Mission is growing; its action is being felt at different levels of consciousness, attracting souls in distress that seek an option beyond this world, without being able to express themselves there – with repercussions here below that are known. Only these messages are to be considered, as so many years give proof of their sincerity and the action they can have on hearts. A specific energy characterises them, hence our unceasing action over so many years. The Masters here come together and support this action, so greatly. It is unprecedented in history. This has already been mentioned by the previous Master, our dear Parthasarathi, who is so attentive to this Mission which he too will always carry in his heart.

We want for this path the best possible, and his successor is supported and encouraged in these far-reaching projects, some of which will be realised. Everything

in its time. Evolution is moving slowly in the current era, preparing for the future an unprecedented acceleration of phenomena.

May all be strengthened and blessed. We are seeing to it.

Babuji
