Whispers from The Brighter World

Tuesday, May 24, 2016 – 10:00 a.m.

The past is the past, it is rich in effects and incarnations that have marked the present. It prepared you to carry out this task to the best of your ability, with the heart, and completely surrendered. We will not insist any further, so as not to embarrass you; you still have to go on for some time and then move on to something else. This story of messages is unique among its kind in terms of numbers – we repeat – they are very valuable for our Mission, time will confirm these remarks.

Our dear Kamlesh, whose action is far-reaching, will increasingly cover the growing needs of this Mission. Some transformations will have to be carried out to better address these needs, to manage the whole, and to simplify the approach on the material plane, thus amplifying action at the spiritual level. It is as intended, according to the plans of the Divine.

At this level, nothing is done without reason; everything has long been planned and takes shape at the appropriate time.

Has it not been said, 'Spirituality will save the world'. This maxim can make one dream in the current era, but why not prepare for it as well as possible by working with faith and confidence. To the divine power, nothing is impossible. To Sahaj Marg, the field of action is open, it is large and it offers each one a simple means to progress and to open up before oneself broad perspectives, going towards the Infinite. This Infinite can

make one dream, why would it not be accessible? It is up to each one, to all, faith and determination will do the rest.

Blessings to all.

Babuji
