Whispers from The Brighter World

Sunday, May 29, 2016 – 10:00 a.m.

See only the beautiful, what is best in your life. This life has been punctuated by heavy trials, but they have not diminished this call of the Divine, which has marked it profoundly. Capturing these messages is a means for you to express this Love; it carries you through the day. Our scribe is not ordinary. She will leave not only these thousands of writings, but also a special imprint on our Mission. Such is the will of the united Masters; we all value this extraordinary and very important teaching, you can be sure. Many hearts are nourished by it and thus open up more quickly to 'reality'. Nothing is useless in such a process. We do our best to respond to the calls of our brothers and sisters, and these are intensifying at present, as foreseen. The world, slowly but surely, is preparing for future changes. They will be important and will highlight the need for human beings to consider the spiritual aspect in a more continuous way and as a matter of necessity for each one. We are still very far from this, but time is doing its work and the will of the Divine always brings about that which characterises it, at the appropriate time. Our teaching recommends surrender; what could be better in life than when all is done in favour of the higher will.

Everything can then take on its true meaning and lead the seeker to his or her own source, in this incarnation. May the greatest number come towards us – we will provide for it.

Special blessings to all.

Babuji
