Whispers from The Brighter World

Sunday, June 12, 2016 – 10:00 a.m.

Let us continue a little longer. Even if, as people point out to you, the messages are repetitive, they nevertheless transmit a specific energy that is beneficial for our abhyasis. Life is made up of constant repetition, to the point of becoming tiresome, and yet everything that is being accomplished is necessary for humankind, and that will not change. All kingdoms are subject to it; animals and even minerals are caught in this inevitable movement.

Doesn't everything have its raison d'être! Human beings are so small in the face of such power; they can only act according to this force which imposes its law, though they themselves do not hesitate to do the same.

The Sahaj Marg Mission is endowed with a precious asset in these writings; the future will confirm the reasons for this. All teachings emanating from spiritual Masters who have left their mark on this world are bound to be necessary in the training of beings who call for a spiritual path. Such yearning shows a certain wisdom in those beings, as well as their need to progress in this incarnation where they are constrained by their Karma.

Abhyasis from different countries, cultures and educational backgrounds find their place in our way, our Mission, where this way of the heart emerges little by little to one day reach considerable magnitude on all continents. God's ways are unfathomable.

Surrender and gratitude for what is given are two important assets in this process. Everything is counted and contributes to this unparalleled progress.

The best possible to all our dear brothers and sisters, they are looked after and helped. So it is.
