Thursday, June 16, 2016 – 10:00 a.m.

Why should we stop these messages? You receive them with happiness, and they are still read after all these years by many of our dear abhyasis. This asset is precious for our Mission; the future will indeed confirm these comments. What is being done here is to be considered a blessing; the hierarchy of Masters approves it and totally supports this action for the good of all. The singularity of these writings underscores the value. They will take on more and more of it, in the sense that we understand it. Time will judge – this is how it is. The Sahaj Marg Mission is advancing, and it extends itself in the world; it responds to an expectation that corresponds to the present time, which is at the juncture of two worlds and in a state of total confusion, one might say. Humans are destabilised by harmful vibrations produced by what many of them consider to be progress. What price is paid for that; an easier life is appreciated, but the devastating effects would still have to be minimised. These words will be justified more and more by the reality of the facts – they will become obvious to all. The pervading negativity is formidable in more ways than one; it is up to each one to become aware of this and to protect themselves. We want the best for all our abhyasis, but we are still powerless in this domain. We are working in our own manner, for the good of this Mission.

The best ever to all our brothers and sisters, under our blessings.

Babuji
